

Product Data Sheet

Product Code: SHO

Issued: February 23, 2022

What is Shower Star?

SHOWER STAR is a concentrated bathroom cleaner with naturally occurring mildew and mould killers in the formula.

Key Benefits

- ✓ Works without scrubbing
- ✓ Kills mildew and mould
- ✓ Rinsing is not normally required
- ✓ Fresh citrus fragrance

Awarded Good Environmental Choice Award

How does it work?

The wetting and detergent agents in SHOWER STAR work with the organic acids to attack soap scum and water scale. SHOWER STAR also contains ingredients that kill mould, mildew and the fungi responsible for spreading tinea.

For use on...

SHOWER STAR is excellent on showers and baths but also finds use in cleaning basins, taps, vanity units (not marble), urinals, toilets and porcelain tiles.

Technical Data

Properties

COLOUR – Transparent blue liquid
 ODOUR – Citrus perfume
 pH = Undiluted, 2-3
 FOAM – High stable foam

Colour Coding

Product identification is made easy with the Agar Colour Coding system. We have 11 different categories of product

that are identified by colour and number. The product itself has this colour. Also, the colour and number are shown:

1. On the bottle label as supplied.
2. On the matching Dispenser Spray Bottle.
3. On the product chart for Colour Coded Cleaning.

This system has benefits of reducing the chance of using the wrong product, making compliance and staff training easy, showing that the correct products are being used and providing information about usage, dilution and first aid.

Product	Code Colour	Code Number	Type
SHOWER STAR	Dark blue	4	Toilet and bathroom cleaners

SHOWER STAR is a Colour Code 4 (dark blue) product.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996

SAI Certificate No.: QEC7358

Environmental Care

SHOWER STAR provides excellent cleaning power with an absolute minimum impact on the environment. Consider the following features:

- * BIODEGRADABLE INGREDIENTS - Rapidly breaks down into friendly by-products.
- * ALL NATURAL, RENEWABLE INGREDIENTS – SHOWER STAR is made from renewable resources and those that can be re-grown. Detergents are derived from coconut oil, acids from citrus fruit and malt products and the perfume from citrus fruit.
- * ORGANIC ACID INGREDIENTS – SHOWER STAR contains mild food acid that is low in corrosiveness and low in toxicity. Cleaners will want to use this cleanser.
- * NO PHOSPHATES, CHLORINE OR INORGANIC ACIDS. SHOWER STAR will quickly attack the soil it's intended to, yet it's very sympathetic to both our environment and the product user.

Health

Concentrated SHOWER STAR is classified as hazardous according to the criteria of Safe Work Australia. It is irritating to the skin and causes serious eye damage.

SHOWER STAR becomes non-hazardous when diluted to 1 in 8.5 (11.8%) in water. Please refer to the Safety Data Sheet for more information. SHOWER STAR contains no ingredients that are classed as Toxic.

Application

SHOWER STAR cleans the whole bathroom:

Showers & Baths:

- For heavy build-ups, use SHOWER STAR 50 parts plus 50 parts water for the initial clean. Allow a few minutes to attack fat and soap scum, then scrub and rinse off – OR – just spray the foam on and leave it. If it is used every day, SHOWER STAR can be diluted to 1:10. Do not use on terrazzo shower bases.

Toilets & Urinals:

- Use neat or dilute up to 1 part in 5 parts with water. Apply 40ml per toilet bowl. Leave for a few minutes to attack any build up. Scrub well if bowl is rusty or heavily soiled. Rinse toilet seat with clean water after cleaning.

Basins, Benches & Taps:

- Dilute SHOWER STAR to 1 in 10 parts with water. Apply the solution to the surface, sponge, or mop to remove soil, then rinse and wipe dry. (Do not use on marble bench tops).
- SHOWER STAR may change the colour of metallic brass; so make sure brass taps have a clear coating on them before use.

Washroom Floors & Walls:

- Dilute SHOWER STAR from 1 in 50 parts water for heavy build up, to 1 in 100 parts water for normal cleaning. Mop ceramic and porcelain tiles with this solution. Do not use on marble or terrazzo floors, use pH-7 instead. You may need to scrub the grouting to remove heavy black soilage. Both painted and tiled walls may be cleaned with SHOWER STAR to prevent the growth of mildew. Please test on paintwork before use.

Disposal Information

1. Used solutions -

Used Solutions of SHOWER STAR should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste.

Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system. Although SHOWER STAR has a low aquatic toxicity, detergents in general are not good for aquatic wildlife.

2. Unused product -

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container). If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater. Remember, do not mix different cleaning products together during disposal!

**3. Empty packaging -
Bottles and drums -**

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. SHOWERSTAR containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons -

Our cartons contain a minimum of 70% of recycled cardboard and/or paper. Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 1L, 5L, 20L

Dispensing Accessories:

- 750ml Squirt Bottle – Code D7S
- Disc Top Cap – Code R1C
- Hand Pump for 5L Bottle (30ml/Stroke) – Code DHP30
- Hand Pump for 20L Drum (30ml/stroke) – Code DHP20
- Tap in Cap 5L - Code DTC5
- 20L Drum Tap – Code DTAP
- Tap in Cap 20L – Code DTC20
