

What is Spa Clean?

SPA CLEAN is a cleaner and sanitiser for use in removing fats, oils and debris from spa bath pipes.

Key Benefits

- ✓ Emulsifies all fats and debris from inside the pipes
- ✓ Kills germs to provide good hygiene – protects your guests
- ✓ Provides a pleasing, fresh perfume while in use

How Does It Work?

SPA CLEAN attacks fat, soap, hair and debris from inside the pipes. The recirculating pump moves the solution into the bath so it can be drained away. SPA CLEAN is an anti-bacterial product that kills germs, mould and fungi that can breed in the pipes if left untreated. Health departments recommended that these pipes be cleaned regularly with a good degreasing product like SPA CLEAN.

For Use On...

SPA CLEAN is suitable for all spa bath units in hotels, motels, fitness centres and resorts. It is also ideal for hot tubs and spa pools. You can also use SPA CLEAN to sanitise automatic dishwashers and washing machines.

Technical Data

Properties

COLOUR – Clear, Colourless liquid
 ODOUR – Fresh citrus perfume
 pH = 9.5 – 11.5
 FOAM – Low foam height

Environmental Care

SPA CLEAN conforms with all statutory environmental requirements. It is based on non-toxic ingredients selected to perform efficiently so there is no waste or damage. It is non-flammable and phosphate-free. SPA CLEAN is based on biodegradable surfactants.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Spa Baths:

In the hospitality industry, spa baths should be degreased and sanitised between each client or after each room stay.

1. Fill the spa bath with water until the jets are covered.
2. Add 50ml of SPA CLEAN to the water.
3. Turn on the jets and pump.
4. Let the jets recirculate the solution for 5-10 minutes, or longer if the pipes are very dirty.
5. Turn off the pump. Drain the bath.
6. Rinse bath with clean water.
7. Apply SPA CLEAN to a cloth and wipe down the bath surface and surrounds.
8. Polish dry with a clean, dry cloth.

Spa Pools:

1. Once a week, add 25ml of SPA CLEAN to help prevent the build-up of body fats in the pipes.
2. When the water is changed, remove the filter cartridge and clean with strong detergent to remove all body fats. While the filter is out, add SPA CLEAN at the rate of 100ml to every 1000 litres of spa pool water. Turn the pump on and off several times and run the filter for 15 minutes, then dump the water.

Disposal Information

1. Used solutions -

Used Solutions of SPA CLEAN should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container). If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Product Data Sheet

Product Code: SPA

Issued: June 19, 2025

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. SPA CLEAN containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 1L, 5L
