

What is Oven Clean?

OVEN CLEAN is a fast-acting, foaming detergent which is designed for removing fat, grease, carbon and burnt-on food residues from ovens, grills, hotplates and combination steamer ovens. The OVEN CLEAN foaming trigger produces a rich, dense foam which clings to vertical surfaces.

Key Benefits

- ✓ Clings to vertical surfaces
- ✓ Fast acting
- ✓ Very effective on films of burnt meat and fat

How Does It Work?

OVEN CLEAN is an alkaline detergent with ingredients to dissolve and emulsify oils and fats (anionic and nonionic surfactants and water-soluble solvents) as well as saponifying fats (potassium hydroxide). It is a water-based detergent. The hydroxide level is set at the correct concentration to prevent any attack of the seals in combi-ovens.

For Use On...

Ovens, grills, hotplates, barbeques and combination steamer ovens.

Technical Data

Properties

COLOUR – Clear, reddish-orange liquid.
ODOUR – Faint solvent
pH = 13.0 – 14.0

Dangerous Goods Classification

OVEN CLEAN is a Class 8 corrosive liquid.

U.N. Number: 1719	Class: 8
Packing Group: II	HAZCHEM: 2R

Environmental Care

OVEN CLEAN conforms with all statutory environmental requirements. It is based on effective ingredients selected to perform efficiently so there is no waste or damage. OVEN CLEAN is non-flammable and biodegradable. OVEN CLEAN containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

- WEAR SAFETY GLASSES & GLOVES when using OVEN CLEAN. Refer to Safety Data Sheet (SDS) for more details.
- Apply OVEN CLEAN using the foaming bottle supplied by Agar. Do not use spray bottle.
- Do not spray around food. Remove food from the area and store safely.

Convection Ovens:

Preheat oven to 60°C then turn off. Spray neat OVEN CLEAN foam onto surfaces and leave 5 minutes to activate. Loosen carbon residues with stiff brush or scraper. Wipe up dissolved solids with damp cloth then rinse thoroughly with clean water.

Combi-Ovens:

Switch off Combi-Oven and allow it to cool down slightly (it must be less than 80°C). Spray neat OVEN CLEAN foam onto internal surfaces and leave 5 minutes to activate. Wipe with a cloth, sponge or pad to help product break down residue. Remove all residue by wiping up with a damp cloth. Rinse surfaces with clean water.

Do not spray anything on the air intakes of the oven. The hand shower may be used to clean inside the Combi-Oven but not for the outside.

Grills & Hotplates:

Turn hotplate off after use and allow to cool for 5 minutes. Surface should be warm but not at full heat. Scrape food residues off then apply neat OVEN CLEAN. Leave wet to activate for 10-15 minutes. Scrub with brush, spatula or griddle pad then wipe clean with cloth. Rinse well with potable water. Brush surface with cooking oil.

- OVEN CLEAN is excellent on steel, stainless steel and enamel surfaces.
- Do not apply to aluminium or house paint surfaces.
- If squirted on aluminium by accident, rinse off thoroughly with water before it dries on the surface.
- Do not use on very hot surfaces as irritating vapours will be produced.
- Always wipe up all this product from surfaces before re-heating and using the appliance. OVEN CLEAN must be fully rinsed off after use.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Disposal Information

1. Used solutions

Used Solutions of OVEN CLEAN should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. OVEN CLEAN containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 750ml, 5L
